DETAILED ACTION

Claims 17-24 have been cancelled by the Amendment filed on 11/23/2007.

Therefore, claims 1-2 and 7-16 are pending.

Response to Arguments

Rejection of claims 1-2, 7-16, and 17-24 under 35 U.S.C. §112 1st paragraph, enablement

Applicant's amendment by canceling the rejected olefin as starting material from claims 1-2 and 7-16 obviates the rejection.

The rejection of claims 17-24 is moot because Applicant has canceled claims 17-24.

Reasons for Allowance

The present invention relates to a process for preparing cyclic carbonates comprising reacting an epoxide with carbon dioxide, in the presence of a zeolite-Y catalyst, and separating the catalyst and recovering the corresponding cyclic carbonate formed. The closest prior art of record is *U.S. Patent 6,407,264* ("the '264 patent").

The '264 patent disclosed a process for preparing cyclic ethylene carbonate, comprising reacting ethylene epoxide with carbon dioxide in the presence of a catalyst system comprising a metal halide [MX_m] and pyridine or pyridine derivative (e.g. 2-methyl pyridine,...). The instantly claimed process is patentably distinct from the prior art process because the instantly claimed process using phthalocyanine as the coordinating ligand, and pyridine or pyridine derivative is used as the coordinating ligand, they are structurally distinct from each other. Therefore, Claims 1-2, and 7-16 are allowed.

Conclusion

Claims 1-2 and 7-16 are allowed.
